Education

Cavite State University – Trece Martires City Campus
Bachelor of Science in Information Technology
Cavite

2022 – 2026
General Trias,

Experience

LabsToGo

Virginia, USA

Full Stack Developer

May 2024 - Present

- Developed Flutter mobile applications for iOS and Android, enabling users to book on-demand medical laboratory services.
- Built responsive web applications using Next.js, improving the patient booking experience across desktop and mobile devices.
- Designed and maintained REST APIs using NestJS to support mobile and web applications.
- Integrated Firebase Authentication, Stripe, Twilio, and SendGrid for secure authentication, payments, SMS notifications, and email communication.
- Collaborated with designers, QA engineers, and project managers to deliver production-ready features in an Agile development environment.
- Implemented CI/CD pipelines with Codemagic to streamline build and deployment workflows.
- Published and maintained applications for both Google Play Store and Apple App Store.

Servebeez

Cavite, PH

Web Developer Intern

February 2026 - May 2026

- Developed responsive web applications using modern JavaScript frameworks.
- Improved website SEO through technical and on-page optimization strategies.
- Integrated Google Analytics and advertising scripts for campaign tracking and conversion monitoring.
- Optimized application performance by reducing page load times and improving frontend-backend communication.
- Collaborated with senior developers to deliver new features and bug fixes.

Celebreak

Barcelona, Spain

Flutter Developer

November 2024 - February 2025

- Contributed to the development of TownSquare, a Flutter application focused on community engagement.
- Built and maintained reusable UI components following responsive design principles.
- Improved application performance and UI responsiveness across Android and iOS devices.
- Collaborated with cross-functional teams to deliver new features and improve user retention.

Avyan Global

Nueva Ecija, PH

Flutter Developer

June 2022 - March 2024

- Developed blockchain-enabled Flutter applications integrating decentralized technologies and REST APIs.
- Implemented efficient state management to support real-time blockchain transactions.
- Designed and integrated REST APIs for seamless communication between mobile applications and backend services.
- Collaborated with designers and backend developers to deliver production-ready mobile features.
